

The right TEVAR stent-graft, every time

AllStent Appoints Canadian Vascular Surgeon Dr. Adam Power MD, to CAB

“We always want to be able to predict the future for our patients and their treatments – this software will finally allow us to do just that with endovascular treatments of thoracic aorta pathology” Adam Power MD, Vascular Surgeon

Date of release: Monday Feb-3

Locations: Toronto, Canada; and Milan, Italy

AllStent, with Business, Finance and Regulatory operations in Toronto, Canada; and Research & Development in Milan, Italy, is pleased to announce the appointment of Dr Adam Power MD to our Clinical Advisory Board (CAB).

Paul Chipperton, AllStent’s CEO stated “Adam sits at that rare intersection, a successful internationally-trained clinician and researcher... *and* medical device entrepreneur. Here we have someone who can translate the complexities of daily clinical practice into a start-up’s product development from the outset, making sure we are directly meeting end-user need.”

Dr. Adam Power is a vascular surgeon and Associate Professor in the Division of Vascular Surgery at Western University, Canada which he joined in the fall of 2012, and is involved in all aspects of academics and clinical care. Beneficially, Dr. Power also serves as the Co-Founder and Chief Medical Officer of Front Line Medical Technologies Inc, a leader in innovative medical devices for trauma and emergency care that is committed to lowering the barriers in bleeding control and resuscitation. Dr. Power was instrumental in the development of COBRA-OS®, drawing on his unique clinical viewpoint and expertise to ensure utmost patient safety and assist with the company’s global expansion. Dr. Power obtained his medical degree from Dalhousie University, Canada, followed by his general surgery residency at McMaster University, Canada. It was during this residency that Dr. Power also secured a Master of Bio-Science Enterprise (MPhil) degree from the University of Cambridge, UK. He then headed to Mayo Clinic, USA for a vascular surgery fellowship to round out his training.

ABOUT AllStent

AllStent was formed in July 2024 as a spin-out of Politecnico di Milano, Italy (Polimi), co-founded by a young female team of PhD's and Post-Docs from Dr Migliavacca's *in silico* medicine group in Computational Biomechanics. Just since 2019, with >70 academic peer-reviewed publications on the topics of cardiovascular and neurovascular mechanics, the company was formed to commercialise in the area of greatest need, pre-operative planning and post-operative complication assessment of complex TEVAR surgeries.

Delivering an unmet market pull directly from surgeons, AllStent is offering unique patient-specific high-fidelity 3D-simulations and accurate "digital twins" of the anatomy and TEVAR procedure, range of optimal stent-grafts, and best-fit and post-deployment risk analysis.
